Dynamic Blocks & Tool Palettes

The PPI Group's Dynamic Blocks and Tool Palettes course will teach you how to create blocks that are intelligent and flexible.

A block library might have dozens of windows. With Dynamic Blocks you can create one block that takes the place of all these related blocks and be confident that modifications match the dimensions of their real-world objects.

Once you've created your block library, leverage the power of Tool Palettes to manage your blocks. Tool Palettes allow you to categorize your blocks, enforce company CAD standards and automate command functions.

This four hour class covers:

- Inserting and manipulating dynamic blocks
- Creating dynamic blocks
- Using the Dynamic Block Authoring Tools
- Adding Blocks to Tool Palettes
- Modifying Tool properties in Palettes
- Adding Custom Commands to Tool Palettes
- Tailoring Tool Palettes
- Importing and Exporting Custom Palettes
