

Training Course Outline

Prerequisite: It is recommended that you have a working knowledge of Revit® Architecture. Knowledge of basic techniques are assumed, such as creating walls, roofs and other objects, copying and moving objects and creating and working with views, etc.

Course Fee: \$425

Course Length: 1 day

Register: For upcoming dates and times, please call our training coordinator at 800.247.1927 or view our training calendar at www.thePPIgroup.com/training.html

We have two locations to serve you:

Portland Office:
503.231.1576 | 800.247.1927

Seattle Office:
425.251.9722 | 800.558.5368

Revit® Architecture Collaboration Tools

Revit Architecture is a Building Information Modeling (BIM) tool, which can be used by more than one person working on a new project. This is an important feature in collaboration within a project, between projects and with other users, firms and disciplines. The objective of the Revit Architecture Collaboration Tools training is to enable students who have a basic knowledge of Revit to increase their productivity while working with other people on a team, either in the same firm or with other firms, and while working with Revit files or other CAD files.

Topics:

- | | |
|--|---|
| <ul style="list-style-type: none"> • Setting up Project Phasing • Creating and Displaying a Variety of Design Options • Using Groups • Linking Revit Files • Importing and Exporting Files, including Exporting for Energy Analysis | <ul style="list-style-type: none"> • Understanding, Using and Setting up Worksets • Using Multi-Discipline Coordination |
