

FOR IMMEDIATE RELEASE

## **PPI GROUP CHOSEN TO OFFER NEW AUTODESK® BUILDING ANALYSIS SOFTWARE**

**Portland, OR and Kent, WA 9/10/09** - The PPI Group announced today that they have been chosen to add Autodesk® Ecotect™ Analysis and its companion product, a web-based service, Autodesk Green Building Studio to their current offerings as an Autodesk Premier Solutions Provider. Autodesk Ecotect Analysis is a concept-to-detail sustainable design analysis solution with architect-designed desktop tools that measure the impact of environmental factors on a building's performance and web-based technology for whole building analysis.

Kevin Closson, Technical Manager for the PPI Group, says, "We are proud to be able to offer this new product as a complementary software tool to the Revit Architecture and Revit MEP product line we already offer. Our technical team has already been working with the product, so that we can continue to offer our clients the highest quality training on this product, just as we do with all other Autodesk products we support." The comprehensive analysis capabilities of Ecotect Analysis help you to analyze and simulate conceptual designs, study alternatives and make decisions earlier to deliver achievable, resource-efficient building designs.

### **Ecotect Analysis 2010 includes tools for:**

- **Whole Building Energy Analysis**
- **Carbon-Emissions Estimates**
- **Water Use and Cost Estimates**
- **ENERGY STAR Scoring**
- **LEED Daylighting Credit Potential**
- **Natural Ventilation**
- **Wind Energy**
- **Photovoltaic Collection**
- **Thermal Performance**
- **Solar Radiation**
- **Visual Impact**
- **Shadows and Reflections**
- **Daylighting**
- **Shading Design**
- **Acoustic Analysis**
