

# AGC UNIVERSITY

---

## OREGON-COLUMBIA CHAPTER

### COURSE DESCRIPTION

**Course Title:** Finding Your Way Around in AutoCAD

**Course Level:** 101

**CCB CEUs:** 2 hours

**Date/Time:** March 11, 2010, 7:30–9:30 am

**Location:** AGC Center, Wilsonville

**Cost:** \$69 for members/\$139 non-members

**Course Description:**

Some contractors are still using pen and paper to collaborate with architects and engineers. This course will focus on getting contractors comfortable collaborating digitally using AutoCAD and how to easily transition from the paper workflow to a digital workflow. We will discuss the types of documents AutoCAD can import and export, some of the navigating tools for viewing digital files and modifying tools.

**Learning Outcomes:**

- Get contractors quickly up to speed in effectively using a robust program like AutoCAD
- How to import digital files from architects and engineers
- How to navigate around the digital file
- How to make changes to a digital file
- How to print and export from AutoCAD

**Presenter:**

- Ken Kauno, Senior Application Engineer, The PPI Group
